

UA Center for Transformative Research in Metabolism
Journal Club and Well Haven Occupational Therapy are pleased to
present...

Emily Byl, Founder of Well Haven Occupational Therapy
Occupational Therapy's Role in Alaska's Aging Issue

Alaska has the fastest growing aging population in the U.S., with an estimated 8,500 older Alaskans diagnosed with Alzheimer's Disease and Related Dementia. What services are available to promote aging-in-place, improve safety, and enhance engagement in self-care and meaningful activities for people living with dementia and that also offer crucial support to family caregivers?

Please join us on **Friday, June 24 at 12:00 noon** for a discussion about occupational therapy, a health field using research-backed interventions designed to maximize independence and functioning for older adults living with chronic health conditions, including frailty and Alzheimer's disease. [Well Haven](#) offers occupational therapy and aging-in-place services for people throughout Alaska with in-home and virtual telehealth visits.

This presentation will be held by [zoom](#) or call 1 669 900 6833# (Meeting ID: 899 633 093) for audio only. For more information, please contact [Emily Byl](#), [Dr. Kelly Drew](#), [Denise Daniello](#), or [Dr. Carl Murphy](#) (for zoom related questions).
