

EAC meets in Denali Park, Aug. 3-5, 2023.

TRiM's External Advisory Committee held an in-person meeting at Denali Park, Murie Science and Learning Center with TRiM investigators to hear research and core project updates and engage in a strategic planning session for the Center for TRiM. This meeting also included a free public talk titled "Comfortably Cold: Hibernating Mechanisms of Alaska Mammals" delivered to a packed room that focused on hibernators living in Denali Park. Panel speakers included TRiM researchers Oivind Toien, PhD; Anya Goropashnaya, PhD; and Sarah Rice, PhD.

Dr. Sarah Rice describes hibernation as an “adaptation to anticipated famine, not cold” to a crowd gathered in the Murie Science Learning Center for the TRiM public talk.
